

## Egg Hunt

Emmett came to the planet Autumn for the challenge of the new frontier. A whole new world for humanity under open skies, breathing fresh air instead of canned and recycled air. The only problem? Humans can't eat anything on Autumn. Not without the enzymes engineered into the eggs of the skreeches, a native species resembling feathered dinosaurs. He isn't the only one hunting the eggs. Native predators threaten to steal the eggs first. Plus he's got a biologist from the enclosed Terransphere colony following him around. If Emmett can't get the eggs he can't survive in the wilderness.
