

India Macroeconomics Annual 2009

This annual publication analyzes interesting macroeconomic events of contemporary India using macroeconomic and statistical tools. Its focus is on problems affecting the economy in general; it not only addresses problems of the Indian economy, but also has a fairly broad perspective that would be applicable to the conditions in other countries. The first part of the volume deals with macroeconomic issues while the second part comprises academic research papers covering a wide range of topics such as labor, fiscal issues, banking and finance, international trade, econometrics, and computational and mathematical methods. Each paper studies topics relevant for developing countries through pure and applied economic theory and econometric methods.
