

## Small Steps

Adam Trinh has everything that he needs to colonize the solar system. He has his own space station at the L5 Earth-Moon Lagrangian point, a captured asteroid for building material, and the technology for line of sight travel (nicknamed Lost). He has everything that he needs, except for the support of one government back on Earth that wants it all. *Small Steps* is a story from multiple points of view, set in the near future, when the colonization of the solar system is finally possible.
