

# Economic Development in the Context of China: Policy Issues and Analysis

The author takes a fresh look at Chinas economic policies, development strategies and economic experiences since 1978. General economic principles and analysis are applied in a comparative framework which provides useful insights for assessing Chinas economic strategies and its implication for other developing countries. Among the topics discussed are market reforms, new technology and technology transfer, foreign direct investment, regional development, poverty and income inequality, agricultural development, industrial development, enterprise management, the tourism industry, population policies and international issues raised by Chinas economic development.
