

Trade Costs and Inclusive Growth: Case Studies from WTO Chair Holders

This book looks at how implementation of the WTO's Trade Facilitation Agreement (TFA) can help reduce trade costs and promote growth. The publication brings together contributions from ten participants in the WTO Chairs Programme, which supports trade-related activities by academic institutions in developing countries. The book looks into how the Aid for Trade initiative can assist with implementing the TFA, the importance of mainstreaming trade into national development strategies, and the potential impact of the TFA in various regions.
